

Edwin Gabriel Villanueva

+1 (772) 607-3308 | Edwin.villa2@icloud.com | <https://www.linkedin.com/in/edwin-villanueva> | <https://edwinvilla72.github.io>

Professional Summary

Computer Science student at UCF specializing in AI-driven and full-stack systems that merge creativity with technology. Experienced in building interactive dashboards, intelligent agents, and scalable tools using C, Python, JavaScript, and React. Eager to contribute to Nintendo's mission of creating joyful experiences through innovative software.

Education

University of Central Florida | Orlando, FL

Expected Graduation: May 2026

Bachelor of Science in Computer Science

- **GPA:** 3.5 | Dean's List
- **Foundation Exam:** Scored 94/100 (Top 1%)

Relevant Coursework: Software Engineering (MS), Systems Software, Mobile Device Software Development, Object Oriented Programming, Security in Computing, Topics in Cloud Computing and Cybersecurity (AWS), AI Game Programming, Senior Design

Indian River State College | Fort Pierce, FL

April 2022

Associate of Arts - General Studies (Computer Science Track)

- **GPA:** 3.5 | Dean's List

Relevant Coursework: Computer Programming in C++, College Computing

Skills

- **Programming Languages:** C, Python, JavaScript/TypeScript, C++, C#, PHP, HTML/CSS, Java, Haskell, Swift
- **Frameworks/Tools:** Node.js/Express, React, Three.js, Flask/FastAPI, Gymnasium, OpenAI API
- **DevOps/Systems:** GitHub Actions, Linux, Docker, SSH, Proxmox
- **Languages:** English (native), Spanish (proficient)
- **Currently Learning:** Rust, Tauri

Work Experience

Command Post Technologies | AI Software Engineering Intern

June 2025 – Present

(Defense AI R&D Internship – Reinforcement Learning | Systems Integration)

- Developed AI-driven cyber defense agents for virtualized training, enabling automating red-team simulations and real-time analytics using Python, FastAPI, JavaScript, and PostgreSQL.
- Built internal dashboards to visualize agent activity and results for both technical and non-technical users.
- Led development of an autonomous penetration-testing agent featuring reinforcement learning-based decision-making and secure tool execution to emulate adaptive adversary behavior.

Military and Veterans Student Success Center | Peer-Success Coach

August 2024 – June 2025

- Connecting students with campus resources, such as peer-tutoring, counseling services, career development, and financial aid to support their professional and academic success.

Project Experience

Intelligent Browser Agents | Project Manager

August 2025 – Present | University of Central Florida

- Led a 5-member senior design team developing AI-powered browser agents capable of autonomous web navigation, DOM extraction, and multi-step automation.

Fitopia | (Semester-long POOSD Project)

January 2025 – May 2025

- Led a team of 6 as Project Manager to develop a fitness tracking web app using the MERN stack, with interactive 3D dashboard, secure authentication and XP-based progression.
