

Edwin Gabriel Villanueva

+1 (772) 607-3308 | Edwin.villa2@icloud.com | <https://www.linkedin.com/in/edwin-villanueva> | <https://edwingabriel.com>

Professional Summary

UCF Computer Science graduate specializing in AI-driven and full-stack production systems. Experienced in building interactive user interfaces, intelligent agents, and secure, scalable tools using Python, TypeScript, C, and React.

Education

University of Central Florida | Orlando, FL

May 2026

Bachelor of Science in Computer Science

- **GPA:** 3.6 | Dean's List (4x)

Relevant Coursework: Computer Science 1&2 (Data Structures & Algorithms), Software Engineering (MS), Systems Software, Mobile Device Software Development, Object Oriented Programming, Security in Computing, Topics in Cloud Computing and Cybersecurity (AWS), AI Game Programming, Senior Design

Indian River State College | Fort Pierce, FL

April 2022

Associate of Arts - General Studies (Computer Science Track)

- **GPA:** 3.5 | Dean's List

Relevant Coursework: Computer Programming in C++, College Computing

Involvement: Society of Hispanic Professional Engineers (SHPE) - Member since January 2025

Skills

- **Programming Languages:** C, C#, Python, JavaScript, TypeScript, C++, HTML/CSS, Java, Swift, SQL
 - **Frameworks/Tools:** Node.js/Express, Next.js, React, Tailwind, FastAPI, OpenAI API, Unity
 - **DevOps/Systems:** GitHub Actions, Azure, Linux, Docker, SSH, Proxmox, AWS Cloud Services
 - **Languages:** English (native), Spanish (proficient)
-

Work Experience

Entertainment Technology Partners | Full Stack Developer

February 2026 – **Present**

- Build and optimize an accounts payable platform integrating Microsoft Business Central, Entra, and AWS, including redesigning storage from ~9 GB to ~25 MB (~99.7%) while migrating 42,700 records with zero uncopied records.
- Own end-to-end development of KNW, an AI-powered live-event analytics platform, spanning React/Next.js interfaces, AWS cloud services, video streaming, analytics, containerized edge devices, deployment, and production reliability.
- Design event-driven cloud services using AWS Lambda, DynamoDB, S3, IAM, and streaming infrastructure to process and deliver real-time analytics from live-event workloads.
- Diagnose and resolve production failures across cloud infrastructure, third-party integrations, streaming pipelines, application logic, and user-facing systems using logs, runtime validation, and targeted debugging.
- Partner with business leaders, accounting stakeholders, sales, technical teams, and clients to translate operational requirements into production software features and resolve deployment issues.

Command Post Technologies | AI Software Engineering Intern

June 2025 – February 2026

- Developed backend systems, workflows, and dashboards for simulated AI environments using Python, FastAPI, JavaScript, PostgreSQL, and Microsoft Graph integrations.
 - Integrated agent-based tools for real-time analysis, enabling users to observe, control, and evaluate simulated distributed system behavior through a web-based interface.
-

Project Experience

Intelligent Browser Agents | Project Manager

August 2025 – **Present** | University of Central Florida

- Managing a 10-member senior design team and developing AI-powered browser agents capable of autonomous web navigation, DOM extraction, and multi-step automation. Continuing after graduation.
- **Selected as a finalist for the UCF Senior Design Showcase 2026.**
