

Edwin Gabriel Villanueva

+1 (772) 607-3308 | Edwin.villa2@icloud.com | <https://www.linkedin.com/in/edwin-villanueva> | <https://edwingabriel.com>

Professional Summary

Computer Science student at UCF specializing in AI-driven and full-stack system-based applications that merge creativity with technology. Experienced in building interactive dashboards, intelligent agents, and scalable tools using C, Python, JavaScript, and React.

Education

University of Central Florida | Orlando, FL

Expected Graduation: May 2026

Bachelor of Science in Computer Science

- **GPA:** 3.5 | Dean's List
- **Foundation Exam:** Scored 94/100 (Top 1%)

Relevant Coursework: Software Engineering (MS), Systems Software, Mobile Device Software Development, Object Oriented Programming, Security in Computing, Topics in Cloud Computing and Cybersecurity (AWS), AI Game Programming, Senior Design

Indian River State College | Fort Pierce, FL

April 2022

Associate of Arts - General Studies (Computer Science Track)

- **GPA:** 3.5 | Dean's List

Relevant Coursework: Computer Programming in C++, College Computing

Skills

- **Programming Languages:** C, Python, JavaScript (TypeScript), C++, C#, HTML/CSS, Java, Haskell, Swift
- **Frameworks/Tools:** Node.js/Express, Next.js, React, Tailwind, FastAPI, OpenAI API
- **DevOps/Systems:** GitHub Actions, Linux, Docker, SSH, Proxmox, AWS
- **Languages:** English (native), Spanish (proficient)
- **Currently Learning:** Rust, Tauri

Work Experience

Entertainment Technology Partners | Full Stack Developer

February 2026 – Present

- Maintaining and extend a production real-time analytics platform, writing and debugging code across backend and frontend systems.
- Implementing backend services using Next.js and AWS (Lambda, DynamoDB) to process event-based data.
- Building interactive UI components in React, focusing on user experience and performance.

Command Post Technologies | AI Software Engineering Intern

June 2025 – February 2026

(Defense AI R&D Internship – Reinforcement Learning | Systems Integration)

- Developed and integrated backend systems and tools for simulated environments, including agent based. Workflows and dashboards for real-time analysis using Python, FastAPI, Javascript, and PostgreSQL.

Project Experience

Intelligent Browser Agents | Project Manager

August 2025 – Present | University of Central Florida

- Led a 10-member senior design team developing AI-powered browser agents capable of autonomous web navigation, DOM extraction, and multi-step automation.

Finalist for UCF Senior Design Showcase 2026

Fitopia | (Semester-long Project)

January 2025 – May 2025

- Led a team of 6 as Project Manager to develop a fitness tracking web app using the MERN stack, with interactive 3D dashboard, secure authentication and XP-based progression.
